

WISI GNOCTFM

Software licence for eight FM radio outputs

Description

The CHAMELEON FM modulators are enabled by the SW option GNOCTFM (8 FM out). The FM modulators supports mono, stereo and joint stereoutput, and can handle RDS insertion. Complying to ITU-R BS.450-3, the Chameleon FM modulator gives you high quality FM output for any size of cable network.

At a glance:

- Up to 8 FM out in one Chameleon
- High output level
- Mono, Stereo, Joint Stereo
- RDS Insertion
- Output frequency 87.5-108 MHz

Technical data

audio decoding	MPEG-1 Layer I/II
Modulation	FM (Referenz ITU-R BS.450-3)
RDS Insertion	Yes (Reference EN50067)
Output frequency	87.5- 108 MHz, 100 kHz step size MHz
S/N	> 60 dB (mono)/ > 55 dB (stereo) dB
C/N, broadband	Typical 65 dB / Typical 60 dBc (FM band 87.5- 108 MHz) dB
