

WISI GNSSDI

Software licence for one SD-SDI output

Description

The CHAMELEON SDI outputs are enabled by the SW options GNSSDI (single SDI output). Complying to the SMPTE 259M and SMPTE 272M, the Chameleon SDI outputs gives access to broadcast grade video and audio for professional applications in all types and sizes of Headends.

At a glance:

- Dual individual SDI outputs via 2 BNC connectors
- Embedded audio - mono, stereo, dual sound
- Uncompressed digital component signals
